EDUCATION

Cornell University, Ithaca, NY — Aug. 2025 – *Dec 2028*
Mechanical Engineering, Bachelor of Science — GPA: 3.077

RELEVANT COURSES

- Kinematics and Heat
- Statics and Mechanics
- Dynamics
- Differential Equations
- Electricity and Magnetism
- Lasers and Photonics
- Linear Algebra
- Thermodynamics

TECHNICAL EXPERIENCES

Cornell Baja Racing — *Nov. 2025 – Present*
Mechanical Engineer — *Ithaca, NY*

- Attend technical classes on automotive engineering basics, learning about all of the parts of the car,
- Design parts for the car using CAD software SolidWorks, connected to its position on the whole car itself.
- Designed the brake lines including materials, placement, and overall design.
- Designing and testing suspension rear control arms using CAD, Ansys, and hand calculations.
- Machining with a CNC, manual mill, and manual lathe.
- Participate in assembly and repairs before and during competition.

Danbury Grassroots Academy — *Jan. 2025 – Aug. 2025*
Lead Robotics Teacher — *Danbury, CT*

- Head Robotics Teacher for 7-8th graders at Danbury Grassroots Academy, leading a volunteer-driven STEM program.
- Design and deliver lessons on LEGO robotics, mechanical design, and core engineering principles, including gear ratios, structural integrity, and sensor integration.
- Teach fundamental programming with LEGO Mindstorms Robot Inventor, covering loops, conditionals, and motor control in both block code and Python.
- Encourage collaboration and problem-solving through partner challenges and guided design iterations.
- Manage class schedules, resources, and milestones, while mentoring a small team of volunteer instructors.

Danbury Robotics — *Sep. 2021 – June 2025*
Lead Designer & Builder — *Danbury, CT*

- Leading the design process and ensuring compliance with VEX standards through detailed documentation of design, build progress, and troubleshooting.
- Creating hand-drawn design schematics, assisting with CAD implementations, tracking design iterations, and thoroughly documenting mechanical testing and system modifications for physical build and programming.
- Collaborating on structural construction, focusing on drive base assembly and component alignment for match performance as well as scoring elements specific to the game elements.
- Programming autonomous routines in C++ using Visual Studio Code, optimizing pathing and sensor input.
- Aiding with strategic planning and match preparation, aligning design and code with alliance needs.
- 51 awards in categories of Design, Programming, and Competition Success.

HONORS

- CT Scholastic Silver Key (Jan 2024)
- WAVE@WPI Champion, *Danbury Robotics* (Dec 2025)
- Vex Spirit Division Champion, *Danbury Robotics* (May 2025)
- Artist On the Rise, Best in Show, *Brookfield, CT* (Mar 2025)
- Connecticut State Champion, *Danbury Robotics* (Feb 2025)
- Vex Robotics World Finalist, *Danbury Robotics* (May 2025)

SKILLS

SolidWorks, Fusion, MATLAB, Ansys, CNC Machining, Manual Machining, Java, Python, Welding (beginner)

INTERESTS

Drawing, woodworking, jewelry making, clothing design, cooking, travel.
Languages: Malayalam (Fluent), Spanish (Conversational)
